

## Field Guide Evaluation

Name Amal Date 3-26-13

You have worked so hard on the Stinger Trail. I am so proud of all you and your classmates have done to create such a fabulous guide for the entire community. Please complete the following survey in complete sentences.

### Plant site

1. What site (plant) did you research? bradford pear tree

Why did you select that plant? I really liked how it looked and I thought it would be interesting to research a plant that produces fruit.

2. What did you learn about the plant? I learned it's scientific name, which is the Pynus Calleryana, and I learned the height and the size of the leaves and interesting facts.

3. What did you think about the exercise that goes with your site? Do you think it will be fun for people to do?

I think the yoga tree pose will be pretty fun for the community to do. I myself, loved doing the yoga tree pose.

4. You worked with a partner on the plant site. How was that experience? How did you and your partner work together?

I liked working with my partner because we were best friends. We worked together by choosing ideas and facts we both approved of.

5. What was the best part about working on the site? (plant and activity)

My favorite part was researching and finding all the cool facts about my plant.

6. What was the most difficult part about working on the site? (plant and activity)

The hardest part for me was setting up the plant facts and activity on a Pages Document.

### **Group Assignment**

7. What group did you work on? numbering the sites on Google Earth

8. What did your group have to do? we had to get to our school on google earth and find the plant sites. Then we

9. Numbered them off.  
How did your group work together? We worked together by showing each other where a site was if one person had trouble finding a certain site. It helped each other

10. Complete the map.  
What was the best part about being in this group? I loved looking at my school grounds on Google Earth and figuring out how to name off sites. I also loved working with my friends.

### **The Whole Project**

11. How did you feel about the class working on the field guide? Do you think it was an important project? Are you proud of what the class created? What did you learn that was new or what new experience did you have doing this?

I am superproud of how far we came through with this project. Being fit is important to me, so this was really important to me with all the plant activities. I learned a lot about the Bradford Pear Tree and I experienced working as a group to let the community learn important stuff.

You have worked so hard on the Stinger Trail. I am so proud of all you and your classmates have done to create such a fabulous guide for the entire community. Please complete the following survey in complete sentences.

### Plant site

1. What site (plant) did you research? loblolly pine.

Why did you select that plant? I selected it because you don't just find a stump just anywhere.

2. What did you learn about the plant? I learned that loblolly means low wet place and that loblolly pines are the most common tree in VA.

3. What did you think about the exercise that goes with your site? Do you think it will be fun for people to do?

I don't understand how stretching your hamstring goes with a stump. I think people will like the stretch.

4. You worked with a partner on the plant site. How was that experience? How did you and your partner work together?

It was a fun experience because I got to hangout with that person. Ali and I worked together well because we both get along.

5. What was the best part about working on the site? (plant and activity)

The research because I learned things I've never known.

6. What was the most difficult part about working on the site? (plant and activity)

making the activity page because you had to  
know all the right words to put on it.

### Group Assignment

7. What group did you work on? The Home Depot.

8. What did your group have to do? Contact Home Depot and  
ask for signs.

9. How did your group work together? We worked together fine  
because we will all change ideas as needed.

10. What was the best part about being in this group? I got to be with  
a lot of my friends.

### The Whole Project

11. How did you feel about the class working on the field guide? Do you think it was an important project? Are you proud of what the class created? What did you learn that was new or what new experience did you have doing this?

I feel that the whole class should be proud of  
what they made. This was important to make  
people go outside more. Yes, because it is for  
a good cause. I learned that a small  
class could create such a large thing as a activity  
trail.

the class should be proud

## Field Guide Evaluation

You have worked so hard on the Stinger Trail. I am so proud of all you and your classmates have done to create such a fabulous guide for the entire community. Please complete the following survey in complete sentences.

### Plant site

1. What site (plant) did you research? Southern Magnolia

Why did you select that plant? I like the magnolia tree in my back yard, so I wanted to learn about magnolias.

2. What did you learn about the plant? I learned the height, scientific name, the type of seeds, and the leave facts

3. What did you think about the exercise that goes with your site? Do you think it will be fun for people to do?

I think the activity at our site works well. I think it will be really fun for people.

4. You worked with a partner on the plant site. How was that experience? How did you and your partner work together?

Trent and I worked together very well. The experience was nice since you did not have to do all the research by your self.

5. What was the best part about working on the site? (plant and activity)

I liked the activity the best because it was fun to exercise while researching.

6. What was the most difficult part about working on the site? (plant and activity)

I think the most difficult part was researching  
since we had to try to find helpful sources.

### Group Assignment

7. What group did you work on? PTA presentation

8. What did your group have to do? We had to present  
our field guide to the PTA, and try to get money

9. How did your group work together? for signs. The group worked  
together by helping each other create <sup>slides</sup> ~~signs~~.

10. What was the best part about being in this group? The best part  
about being in this group was that we got  
to experience what it feels like to present to a  
group of people.

### The Whole Project

11. How did you feel about the class working on the field guide? Do you think it was an important project? Are you proud of what the class created? What did you learn that was new or what new experience did you have doing this? \*

I felt great having the class work on  
this project. I think it was very  
important. It was important because it is  
important to exercise. I am very proud of  
what our class did. I learned that if one  
person doesn't do their job, the whole thing is set back.

### Plant site

1. What site (plant) did you research? dogwood

Why did you select that plant? I thought that it would be interesting to research about a plant that is common

2. What did you learn about the plant? I learned that the dogwood is native and it is a tree that represents VA.

3. What did you think about the exercise that goes with your site? Do you think it will be fun for people to do?

I think it will be fun to do our activity and it will exercise people

4. You worked with a partner on the plant site. How was that experience? How did you and your partner work together?

Yes, and I love working with Madeline because I have known her since kindergarten.

5. What was the best part about working on the site? (plant and activity)

It was fun doing the activity with Madeline.

6. What was the most difficult part about working on the site? (plant and activity)

I think it was the research.

### Group Assignment

7. What group did you work on? teacher survey group

8. What did your group have to do? We had to make a survey for the teachers.

9. How did your group work together? We worked together by each person doing a question.

10. What was the best part about being in this group? That we could work together with our friends and help other teachers and classes go outside.

### The Whole Project

11. How did you feel about the class working on the field guide? Do you think it was an important project? Are you proud of what the class created? What did you learn that was new or what new experience did you have doing this?

I loved working on the field guide because it helps teachers realize that their students can learn outside.

You have worked so hard on the Stinger Trail. I am so proud of all you and your classmates have done to create such a fabulous guide for the entire community. Please complete the following survey in complete sentences.

### Plant site

1. What site (plant) did you research? I am researching Pampass Grass

Why did you select that plant? I selected that plant

because I thought it would be  
fun to research and it was a pretty plant.

2. What did you learn about the plant? Something that I learned  
about my plant is that there is 2 other  
different names that it could be called  
and they are Ravena Grass and Monkey Grass.

3. What did you think about the exercise that goes with your site? Do you think it will be fun for people to do?

What I think about my exercise is that it is very  
athletic. I really think it will be really fun for people  
to do because you can do it with your family.

4. You worked with a partner on the plant site. How was that experience? How did you and your partner work together?

The experience with my friend was good  
and we got along very well. My partner and I worked  
together by communicating with each other and

5. What was the best part about working on the site? (plant and activity)

The best part about working on the site  
was doing the activity for the website.

6. What was the most difficult part about working on the site? (plant and activity)

The most difficult part about working on the site was finding the information on the computer.

#### **Group Assignment**

7. What group did you work on? My group was the Teacher Survey

8. What did your group have to do? My group had to create a survey for the teachers so we could know if they liked the outdoors

9. How did your group work together? My group worked together by each of us taking turns typing on the computer.

10. What was the best part about being in this group? The best part about being in the group is seeing the responses from the other teachers.

#### **The Whole Project**

11. How did you feel about the class working on the field guide? Do you think it was an important project? Are you proud of what the class created? What did you learn that was new or what new experience did you have doing this?

I feel very happy and excited working on the field guide. I think it is a very important project because it is for people to get involved with athletic things.  
I am very proud of what the class created.  
I learned that there are different types of exercises.

### The Whole Project

11. How did you feel about the class working on the field guide? Do you think it was an important project? Are you proud of what the class created? What did you learn that was new or what new experience did you have doing this?

I think this was amazing because we had our own things to do in this huge project. Also I learned new things like QR codes. I think that the technology was awesome. I am proud of the work we have done.

## Field Guide Evaluation

Name Chloe [redacted] Date [redacted]

You have worked so hard on the Stinger Trail. I am so proud of all you and your classmates have done to create such a fabulous guide for the entire community. Please complete the following survey in complete sentences.

### Plant site

1. What site (plant) did you research? Crape Myrtle  
Why did you select that plant? It was a cool plant and its buds were pretty.
2. What did you learn about the plant? People call it Crape Murder because that branches can break things so that have to cut the branches down.
3. What did you think about the exercise that goes with your site? Do you think it will be fun for people to do?  
My exercise was pole push-ups and I think it will be fun for people to do.
4. You worked with a partner on the plant site. How was that experience? How did you and your partner work together?  
me and my partner worked together good because Marian was researching and I was writing down information and putting down on pages
5. What was the best part about working on the site? (plant and activity)  
My favorite part was when we were being taped and I got to do the exercise.

6. What was the most difficult part about working on the site? (plant and activity)

The hardest part was when Mariam and I forgot what component of fitness our activity was.

### Group Assignment

7. What group did you work on? trying to get Mr. Hatcheson to come

8. What did your group have to do? we had to try to find a day he could come because he is only available on Mondays

9. How did your group work together? We wrote a letter to the manager before him and then she did not answer so Ms. Fitz tried to see what was happening.

10. What was the best part about being in this group? It was fun and we got to take time and spend time with the people in our group.

### The Whole Project

11. How did you feel about the class working on the field guide? Do you think it was an important project? Are you proud of what the class created? What did you learn that was new or what new experience did you have doing this?

It was fun to work on the field guide. I think it was an important project since it helped to stay fit. I am proud of what the class created since it was a fun experience to have. I learned that it took a lot of work. Also, if you got one part wrong you would have to keep fixing it until you got it right.
