

September 16, 2013 (4th grade activities)

- Create videos of your kids saying facts in the different regions using PhotoBooth. We can post these videos for parents (optional)
- Design a map out of edible items and take pictures of the kids with their maps. We'll post these pictures on your blog (optional)
- Design a Virginia t-shirts with fabric markers. We would color in the regions and rivers, and then wear them as we sing "Time of Your Life." You would have to get your students to bring in a white t-shirt and ask parents to send in fabric markers if you would like to do this activity. I strongly suggest doing this and I'd love to help!!! This was one of the highlights for me last year in my 4th grade classroom and the kids wore their shirts ALL year!!!
- Create animated pictures that state important facts about VA Geography. These can be posted on your blog (optional)
