

# The Pacific Ocean

The Pacific ocean is the largest ocean. If you think a pool is big, that's nothing compared to the Pacific Ocean!

## Pacific Ocean Depth

My first fact is how deep the Pacific Ocean is. It is 12,999 meters deep. The deepest point is the Marina Trench.

The Pacific Ocean is the largest ocean

## The Pacific Ocean's Temperature

My next fact is what the temperature is in the Pacific Ocean. It rarely gets warmer than 15 degrees Celsius. It can get cold in some places and warmer in others.

## Pacific Ocean saltiness

Finally, is how salty is the Pacific Ocean is. When the water evaporates, the salt is left behind in some places. There's a lot of salt and in some places not that much.

In conclusion, these are the facts I know about the Pacific Ocean. A lot of earthquakes occur near the Pacific ocean.
