

Part 2:
Organisms (plants and animals)

Please do research on the different plants and animals that you may encounter in the zones that you travel through. You need visuals of the organisms and you should have detailed descriptions of them (think about the adaptations that they will need to survive). Remember- the more information you have the better! You will want to come up with at least three questions before your begin your research. You may write down information that you find that does not relate to your questions as you go along.

the Abyss

What is the most dangerous animal that lives in the Abyss?

Is there a type of plant that grows in the Abyss?

What is the biggest and smallest sea creature that lives in the Abyss?

Most sea creatures that live in the Abyss lack a backbone.
