Support of Personal Project: Throughout the course of this school year, Ms. Wolfgang and Mr. Zacharias have developed meaningful IB assessments that have helped our sixth graders learn time-management skills, research skills, and organization skills. The What If Menu is designed to help students challenge their notion of history and time by imagining a scenario that does not exist today. These types of critical thinking skills promote reflective abilities. The Westward Bound project allowed students to practice autonomy, organization, and time management in a supportive environment by having them meet deadlines throughout the marking period and obtain feedback as they progressed. In Sickness and In Health project gave students the opportunity to work with many kinds of resources to help them broaden their understanding of research, such as historical presenters, primary sources, museum documents, educational websites, and government information.
